Opportunities and co-benefits of transitioning to a net-zero economy in Kyrgyzstan, Tajikistan and Uzbekistan, and Managing climate risks to protect net-zero energy goals.

In a significant move towards sustainable energy, Kyrgyzstan has launched a pilot project focusing on energy storage, funded by the Global Environment Facility and implemented by ...

The Energy Sector Master Plan (2022) identifies a combination of hydro and solar as the long-term least-cost solution of energy security for the country, contributing to regional integration and ...

The deterioration of energy sector infrastructure coupled with the financial crisis in the energy system will eventually lead either to a significant decrease in the quality of produced energy or to an increase in ...

Find out about the project and the initiative to ensure a just transition in the Kyrgyzstan context. The Kyrgyz Republic is a mountainous country in central Asia at greater risk of glacial ...

It aims to reduce greenhouse gas emissions, promote renewable energy, enhance energy efficiency, restore forest ecosystems, adopt digital and innovative technologies, and integrate climate ...

This article explores how cutting-edge lithium battery technology addresses regional energy challenges while aligning with global renewable energy trends. Discover why this project matters for utilities, ...

Under this project, 500 kV DC facilities are being constructed in Tajikistan, Afghanistan and Pakistan, and the 500 kV AC energy systems of Kyrgyzstan and Tajikistan are being interconnected with the ...

There are currently no waste-to-energy projects or initiatives. Municipalities of large cities have been considering building plants for converting non-recyclable waste materials into electricity and heat, but ...

Kyrgyzstan Zero Carbon Energy Storage Project

On Christmas Eve, the Central Asian nation of Kyrgyzstan inaugurated its first solar power plant, one that will power a small city and cut 120,000 tons of CO2 emissions annually.
