Norfund, the Norwegian Investment Fund for developing countries has announced a US\$16mn investment in Communication and Renewable Energy Infrastructure (CREI) to build a ...

A key focus of CREI's efforts is the solarisation of power systems at telecom sites, which contributes to reducing CO2 emissions and achieving a Renewable Energy Ratio (RER) of at least ...

Norfund is investing 166 million NOK in the company CREI to provide 2876 mobile towers in Mali with stable solar energy. Mobile coverage plays a central role in most people's daily lives and ...

The project involves installing solar power systems at telecom sites across Mali, significantly cutting diesel consumption and CO2 emissions. Orange Mali announced it has secured ...

The project marks a significant step forward for sustainable infrastructure in Mali, signaling growing interest in clean energy investments across Africa's telecom sector.

On April 25, 2025, a \$40 million investment was announced to modernize the energy infrastructure of telecom towers in Mali. Supported by Norfund and Cygnum Capital, the project aims to install hybrid ...

Backed by Norway's development finance institution Norfund and the Facility for Energy Inclusion (FEI), CREI is set to deploy hybrid solar-battery systems across 2,876 mobile towers in ...

CREI and Orange Mali revolutionize telecom infrastructure with solar-powered network, targeting 2,625 sites and 50% renewable energy ratio to boost connectivity and sustainability.

The solution that CREI will build for mobile towers across the country consists of solar panels combined with batteries, so that the towers have power even when the sun is not shining.

Orange Mali and Communication and Renewable Energy Infrastructure (CREI) are solarising 2,600+ telecom
