HOPSOL Africa is a technology leader for on- and off-grid solar power plants, fuel save controllers as well as solar diesel hybrid systems at utility scale (e.g. mining solutions). We are ...

From hybrid systems that prioritise solar power and use the grid only as backup, to fully off-grid setups for total energy independence, our solar solutions are designed for long-term performance and ...

With parts of the plant already operational and expansion underway, Namibia is firmly on track to meet its ambitious renewable energy targets. As the country continues to invest in renewable ...

Solar Installation Specialist in Namibia. Installations and sales of Solar Panels, Batteries, Inverters and more.

This on-grid roof-mounted system is both economical and reliable, taking advantage of the local power source when available and supplementing it with solar energy, but also providing a much-needed ...

With over 300 days of sunshine annually, Namibia's vast landscapes are ideal for outdoor solar power solutions. This article explores how solar panels transform energy access in remote areas, mining ...

Namibian utility NamPower has advanced plans for a 100MW solar PV project with the agreement of a financing deal and the appointment of contractors to build the plant.

With an average of over 300 sunny days per year and some of the highest solar radiation levels in the world, Namibia has a tremendous natural advantage for harnessing solar energy.

European Union Building Lights Systems Namibia (LSN) was appointed to install a 42.1kWp Solar PV system at the head office of the European Delegation. The installation involved ...

This project not only helps Namibia meet its energy demands but also aligns with regional trends toward solar and wind development, positioning the country as a key player in ...
