Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Are Chinese solar power inverters 'undocumented'?

U.S. security experts have reportedly uncovered undocumented communication devices inside Chinese-made solar power inverters -- hardware that's widely used to support renewable energy infrastructure.

Are Chinese-made solar inverters a security risk?

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication devices inside certain solar inverters.

Is there a secret radio in a solar inverter?

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented communication modules and secret radios embedded in some Chinese-manufactured solar inverters and battery systems.

The increasing reliance on renewable energy sources, particularly solar power, has brought a critical vulnerability into sharp focus: the widespread use of Chinese-made solar inverters ...

Every solar panel and battery connected to the U.S. energy grid relies on a device few people ever consider: the power inverter. In May of 2025, U.S. experts found undocumented ...

Power inverters, which are predominantly produced in China, are used throughout the world to connect solar panels and wind turbines to electricity grids. They are also found in batteries, ...

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained...

U.S. energy officials are intensifying scrutiny of Chinese-manufactured power inverters, critical components

National policy on solar-powered communication cabinet inverters

in renewable energy systems, after discovering undocumented ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden communication ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected ...

U.S. experts have allegedly found rogue communication devices, including cellular radios, in Chinese-made solar inverters and batteries over the past nine months.

U.S. security experts have reportedly uncovered undocumented communication devices inside Chinese-made solar power inverters -- hardware that's widely used to support renewable energy...

U.S. energy officials are intensifying scrutiny of Chinese-manufactured power inverters, critical components in renewable energy systems, after discovering undocumented communication ...
