"Think of supercapacitors as the sprinters of energy storage," says Dr. Lena Fjellström, project lead at Nordic Energy Research. "They're not here to replace marathon-runner batteries, but ...

The project will add 70 MW/140 MWh of storage capacity to SEB Nordic Energy's Finnish portfolio, which already includes wind and hydropower. Located in Nivala Municipality in Finland's ...

Sweden's largest energy storage investment, totaling 211 MW, goes live, combining 14 sites. 14 large-scale battery storage systems (BESS) have come online in Sweden to deploy 211 MW ...

Support for intermittent renewables: With the increasing share of solar and wind power in the Nordic energy mix, batteries can store excess energy generated during peak production times and release it ...

Ingrid Capacity, renowned for optimizing grid-scale battery storage and flexible assets across Europe, entered a strategic partnership with SEB Nordic Energy in September 2024, ...

In this instalment of our Nordic power sector transition series, we explore the emerging technologies in the region's energy transformation. From advanced storage solutions to nuclear ...

During 2025, Locus Energy has taken significant steps in its Nordic expansion. Earlier this year, a groundbreaking ceremony was held for a 70 MW/140 MWh battery energy storage ...

This article explores the Nordic energy storage market's unique opportunities, technological innovations, and practical applications for commercial and industrial users.

As the Nordic countries push forward with rapid electrification and record-breaking renewable energy development, a new structural necessity is emerging in the energy system: the ...

Battery Energy Storage Systems (BESS) lead the Nordic energy storage market in 2025, making up about

Nordic New Energy Storage Power

40-50% of the total market value. Lithium-ion technologies head this segment, ...
