A breakdown of each GSP in the NPg region, with stacked columns for each generation type. If you wish to remove a type from the graph you can click it on the legend at the bottom of the ...

Proposed 150 megawatt (MW) solar energy generation facility and 50 MW energy storage facility in Faribault County, Minnesota. View All... This map depicts the pipeline alternatives being evaluated in ...

The Northern Crescent Solar and Storage project by Primergy Solar in Faribault County would be able to generate up to 150 megawatts of grid interconnected solar power and store up to 50...

The Northern Crescent Solar Project includes up to 150 MW of alternating current (MWac) solar generation and a 50 MWac battery energy storage system (BESS). The battery system will be ...

Description Joint Application for two site permits, a site permit for the Northern Crescent Solar Facility and a site permit for the Northern Crescent Battery Energy Storage System.

NSG was formed in early 2004 to own and operate a portfolio of power plants with long term contracts that was being divested by El Paso Corporation. Since the initial acquisition from El Paso in 2004, ...

The Northern Crescent Solar Project includes up to 150 MW of alternating current (MWac) solar generation and a 50 MWac battery energy storage system in Faribault County. The battery ...

Guidance on connecting small and large-scale generation and energy storage to our network. Can't find what you are looking for? Contact us for more information about your solar panel, storage or ...
