Will Paraguay introduce EVs?

The transition to electric vehicles (EVs) in Paraguay has attracted significant international attention from countries such as Taiwan, South Korea, and from the EU. Through various agreements, these countries have committed to helping Paraguay develop technology and prepare policies to accelerate and promote the introduction of EVs in the country.

Will South Korea develop EV technology in Paraguay?

With the aid of the Korea Automotive Technology Institute (KATECH), the technology centre is expected to develop technology for electromobility in Paraguay. The project has received USD16 million from the Government of South Korea. Through this project, South Korea will transfer its technical knowledge of and expertise on EVs.

Should private operators buy electric buses in Paraguay?

However, despite the significant steps taken to advance electromobility, Paraguay lacks a conducive regulatory landscape to incentivise private operators to acquire electric buses. Currently, only tax exemptions are provided to operators who deploy electric buses.

Why does Paraguay want electromobility?

The push for electromobility is due to factors such as: Dependency on imported fuel: Since Paraguay does not have its own sources of fuel, it is dependent on imports to meet its energy needs.

Paraguay in depth country profile. Unique hard to find content on Paraguay. Includes customs, culture, history, geography, economy current events, photos, video, and more.
