Romania is emerging as a key market for renewable energy storage. Explore the main laws, incentives, and opportunities shaping investments in batteries and hybrid storage projects.

This allows you to view the available charging stations and choose the charging services that suit your needs (subscriptions or Charge & Pay). Through the application, users can organize ...

Under the new "Order on the Methodological Norms", electricity charged from the grid and subsequently discharged back onto it is exempt from several key regulated tariffs in the country.

The National Energy Regulatory Authority of Romania has approved a regulation eliminating double taxation of energy storage, to allow for faster deployment of solutions for storing ...

This project delivers a mobile photovoltaic storage and charging system for Romania and neighbouring countries. Its core integrates photovoltaic, energy storage, and charging infrastructure to provide ...

PPC Blue, part of the PPC group of companies, has unveiled a groundbreaking innovation: the first charging station in Romania powered by renewable energy directly from a photovoltaic park --and ...

The Romanian Ministry of Energy has launched a grant program for battery energy storage systems developed in conjunction with existing renewable energy facilities - wind, solar, or hydro.

One of the most important legislative changes addressed by GEO 134/2024 is the elimination of double taxation of stored energy. Until the enactment of the new GEO, stored energy ...

Indeed, for years energy storage developers in Romania faced a paradox: while renewables expanded rapidly, storage projects were discouraged by economic inefficiencies. ...
