What if a site information package is provided through this solicitation?

If any existing engineering studies or facility conditions reports are provided through this solicitation by way of the site information package, the bidder and contractor shall independently verify all information provided.

What types of electrical plans are included in a PV system?

Electrical Plans, including single-line electrical diagrams showing utility interconnection and all devices comprising the PV system, including, but not limited to: PV arrays, combiner boxes, circuit breakers, disconnect switches, inverters, meters, timers, control devices, and other equipment comprising the complete system.

Who inspects a PV system?

The warranty holder or a roofing contractor certified by the roof manufacturer shall inspect the PV systems to ensure the integrity of the installation. To ensure compliance with provisions of the NEC, an inspection by a licensed electrical inspector is mandatory after construction is complete.

When can a contractor inspect a PV system?

The Government Contracting Officer or the delegated Contracting Officer's Representative may inspect the PV systems at any time during construction or after the PV systems have been put into operation. The Contractor may be ordered to stop work, or shut the systems down, if unsafe conditions or code violations are noted.
