The loan guarantee will finance the deployment of up to 1,000 solar photovoltaic (PV) systems and battery energy storage systems (BESS) located primarily at commercial and industrial ...

The conditional loan guarantee will help deploy up to 1,000 solar and battery energy storage systems in a virtual power plant that spans as many as 27 states.

There are currently 23 states, plus the District of Columbia and Puerto Rico, that have 100% clean energy goals in place.

With a planned photovoltaic capacity of 690 megawatts (MW) and battery storage of 380 MW, it is expected to be the largest solar project in the United States when fully operational.

Montserrat California leads as the top solar state. With over 54 GW of solar installed, enough energy to power over 15 million homes. Texas has the fastest growing solar economy with the largest ...

An overview of Energy Storage Targets across 50 U.S. States, with state-by-state policy progress, key resources, and model rules.

A report that identifies renewable energy siting policies and permitting authorities across all 50 states, highlighting which government entity or entities in each state or territory have the ...

The project consists of a 1,150 megawatt (MW) solar photovoltaic (PV) facility, an up to 4,600 megawatt-hour battery energy storage system (BESS), a 34.5-500 kilovolt (kV) grid step-up substation, a 15 ...

In 2024, generators added a record 30 GW of utility-scale solar to the U.S. grid, accounting for 61% of capacity additions last year. We expect this trend will continue in 2025, with 32.5 GW of new utility ...

Photovoltaic energy storage power station State Grid shortlisted

Project Polo will deploy commercial-scale PV and storage to create integrated virtual power plants across 27 states.
