For decades, California courts gave the policy decisions of state utility regulators unparalleled deference. But those choices now face strict judicial oversight, thanks to a ruling in a ...

The California Supreme Court is set to hear oral arguments in a lawsuit from environmental groups arguing regulators wrongfully slashed credits for homeowners with solar panels.

As homeowners with solar panels challenge significant cuts to compensation rates for excess electricity generated from their systems, this legal battle highlights the ongoing tension ...

The conversion of sunlight, made up of particles called photons, into electrical energy by a solar cell is called the "photovoltaic effect" - hence why we refer to solar cells as "photovoltaic", or PV ...

The Center for Biological Diversity, which petitioned an appeals court and ultimately Supreme Court for review, has argued the policy change decreased incentives for solar panel ...

Photovoltaic systems work by utilizing solar cells to convert sunlight into electricity. These solar cells are made up of semiconductor materials, such as silicon, that absorb photons from ...

The court hears arguments on whether to reverse a decision affecting solar panel compensation, which impacts the growth of rooftop solar in California.

A photovoltaic (PV) cell, commonly called a solar cell, is a nonmechanical device that converts sunlight directly into electricity. Some PV cells can convert artificial light into electricity. ...
