When will PVPS complete 'trends in photovoltaic applications' report be published?

The 30th edition of the PVPS complete "Trends in Photovoltaic Applications" report will be published in Q4 2025. At least 2 156.5 GW of cumulative capacity was installed by the end of 2024, with a further 90 GW possible identified by IEA PVPS Experts, for an estimated global cumulative capacity of 2 246.5 GW.

What is the solar photovoltaics supply chain review?

The Solar Photovoltaics Supply Chain Review, produced by the DOE Solar Energy Technologies Office with support from the National Renewable Energy Laboratory, will help the federal government to build more secure and diverse U.S. energy supply chains.

What is the IEA photovoltaic power systems programme?

The IEA Photovoltaic Power Systems Programme (IEA PVPS) is one of the TCPs within the IEA and was established in 1993. The mission of the programme is to "enhance the international collaborative efforts which facilitate the role of photovoltaic solar energy as a cornerstone in the transition to sustainable energy systems."

The U.S. Energy Information Administration (EIA), the statistical and analytical agency within the U.S. Department of Energy (DOE), prepared this report. By law, our data, analyses, and forecasts are ...

High commodity prices and supply chain bottlenecks led to an increase of around 20% in solar panel prices over the last year. These challenges have resulted in delays in solar panel deliveries across ...

Global photovoltaic (PV) panel exports reached \$51.2 billion in 2022, yet 9.2% of potential revenue evaporates through flawed distribution channels. Our photovoltaic panel export channel analysis ...

As the PV market grows constantly, reporting of PV installations is becoming more complex. IEA PVPS has decided to count all PV installations, both grid-connected and off-grid, when numbers are ...

The Global Solar Council supported this year's report published by SolarPower Europe by providing a comprehensive focus chapter on China's market as well as a dedicated chapter on our policy ...

# Photovoltaic panel export prospect analysis plan

The export market is and will be a key source of demand for Indian solar PV cells and modules, particularly in case of limited Indian demand for India-made solar PV cells and ...

Produced by the U.S. Department of Energy (DOE) Solar Energy Technologies Office (SETO) with support from the National Renewable Energy Laboratory (NREL) and released on ...

There is no doubt that solar power has become the driving force of the global energy transition. Looking ahead, however, there remain challenges that must be addressed for solar to ...

The analysis covers supply, demand, production, energy consumption, emissions, employment, production costs, investment, trade and financial performance, highlighting key vulnerabilities and ...

The world will almost completely rely on China for the supply of key building blocks for solar panel production through 2025. Based on manufacturing capacity under construction, China's share of ...
