Will Port Moresby & Lae get 5G?

The next logical step is 5G in urban centers. While no operator has announced a firm 5G launch date, there have been tests. Given Telstra's involvement, it's plausible that Port Moresby and Lae might see pilot 5G services by the late 2020s once there's sufficient fiber backhaul and enough high-end user devices.

Will 5G drive Digital Inclusion and economic development in PNG?

"These early results indicate that 5G will enable us to drive digital inclusion and support innovation and economic development across PNG," Boudiaf stated. He noted that the company is awaiting the green light from the National Information and Communications Technology Authority (NICTA) to proceed with the commercial launch.

How many mobile phones are there in PNG?

By numbers, mobile phone ownership and coverage have grown impressively. There are about 5 million mobile cellular connections active in PNG (some people have dual SIMs). Importantly, most of these are now on modern networks: over 87% of mobile connections are on 3G or 4G networks capable of data/internet service.

Is Digicel ready to roll out 5G services in Papua New Guinea?

Digicel PNG says it is ready to roll out 5G services across the country following strong results from its initial network testing phase. Chief executive officer Tarik Boudiaf said the 5G trials have delivered impressive outcomes in speed, latency, and efficiency, showing the network's potential to transform connectivity in Papua New Guinea.
