Maximize power plant efficiency with our expertly engineered exhaust systems, stacks, and silencers. Custom solutions for long-lasting, high-performance.

We specialize in the engineering and design of high-performance exhaust stacks for industrial applications. Our services integrate advanced analytical methods and adhere to stringent ...

Universal is an industry leader in the design, manufacture and installation of high performance gas turbine exhaust systems and components.

We conduct acoustic and heat load calculations to determine the best solutions for these highly sensitive applications. Ventilation Products include: Power Plants - Ventilation & Exhaust Systems Installation ...

Our gas turbine exhaust stacks and other air pollution management technologies are designed to increase safety and efficiency for your company, accurately measure your emissions, and reduce ...

Our team specializes in industrial exhaust stack design, repairs, and maintenance, ensuring your stack exhaust systems remain compliant, efficient, and reliable.

Simple cycle power plants consist of a combustion turbine and an integrated chimney or exhaust stack. Many power island projects start with a simple cycle design in order to minimize initial capital costs, ...

Our Exhaust Systems provide all media handling and conditioning needs into and out of the gas turbine, including any exhaust bypass.

Most combined-cycle power plants in the United States have duct burners that help them make additional use of combustion turbine exhaust gases.

EnergyLink International delivers advanced exhaust silencing systems for power plants to reduce noise and

Power plant exhaust system

improve operational performance.
