How much does home battery storage cost?

The cost of home battery storage has plummeted from over \$1,000 per kilowatt-hour (kWh) a decade ago to around \$200-400/kWh today, making residential energy storage increasingly accessible to homeowners.

How much energy can a battery store?

A good rule of thumb is to choose a battery system that can store enough energy to power your essential appliances for 24 hours. For most households, this typically ranges between 10-15 kWh of storage capacity. However, your specific needs may vary based on several factors: First, consider your average daily energy usage.

How much does a residential battery cost?

Popular residential battery systems vary significantly in price, with costs typically ranging from \$400 to \$750 per kilowatt-hour (kWh). Tesla Powerwall remains one of the most competitively priced options, averaging around \$500 per kWh installed, while premium brands like LG Chem and Sonnen tend to fall in the \$600-700 per kWh range.

How can I reduce my battery storage costs?

Several attractive financial incentives can significantly reduce your battery storage system costs. The federal Investment Tax Credit (ITC) currently offers a 30% tax credit on the total cost of solar-plus-storage systems, potentially saving thousands on your installation.
