The cost of lithium-ion batteries per kWh decreased by 20 percent between 2023 and 2024. Lithium-ion battery price was about 115 U.S. dollars per kWh in 202.

In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are developed from an ...

TL;DR: Wholesale lithium-ion pack prices averaged about \$0.115/Wh globally in 2024 (down ~20% YoY), but finished consumer systems (portable power stations) retail much higher due ...

According to BNEF, battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% decrease from 2024. This represents the steepest decline among all lithium-ion battery use ...

New York, December 9, 2025 - lithium-ion battery pack prices have dropped 8% since 2024 to a record low of \$108 per kilowatt-hour, according to latest analysis by research provider BloombergNEF (BNEF).

In today's market, the installed cost of a commercial lithium battery energy storage system -- including the battery pack, Battery Management System (BMS), Power Conversion System ...

Average lithium-ion battery pack costs fell 8% to \$108/kWh in 2025, a 93% drop since 2010. China leads at \$84/kWh with LFP, while stationary storage packs hit benchmark lows of ...

Average price of battery cells per kilowatt-hour in US dollars, not adjusted for inflation. The data includes an annual average and quarterly average prices of different lithium-ion battery ...

Discover the latest lithium battery energy storage prices and industry trends in 2024. This guide breaks down cost factors, regional pricing variations, and application-specific solutions to help businesses ...

Price per kWh of energy storage lithium battery

The price of Lithium Iron Phosphate (LFP) battery cells for stationary energy storage applications has dropped to around \$40/kWh in Chinese domestic markets as of November 2025.
