What is a 19 inch server rack?

A 19 inch server rack is a piece of equipment designed to house and organize IT equipment, such as servers. The main benefit of this type of rack is that it helps keep the equipment cool. These racks generally have venting or openings in them to help with air circulation.

What types of server racks does RS Philippines offer?

RS Philippines offers a wide range of server racks, including open frame and enclosed types, ensuring a suitable computer server rack solution for any environment. A server rack system is a standardized frame designed to hold and organize 19-inch wide networking and computing equipment, following the Electronic Industries Alliance (EIA) standard.

What is the size of a 19-inch server rack?

A 19-inch server rack, such as the APC AR3357 48U Server Rack, is designed to be 19 inches wide and 750mm or 1200MM deep. It is designed to house server equipment and other electronic devices.

What is a 19-inch rack used for?

Commonly used in server rooms and data centres, 19-inch racks are enclosures or mounts for housing computer networking and data equipment infrastructure. Racks can help to ensure that hardware and networking equipment require minimal floor space or shelf installation.
