Solar leasing is a way to get solar power by renting instead of buying solar panels. Homeowners make monthly lease payments. A solar lease can disrupt a home sale.

Solar leasing works in a similar fashion. You get solar panels installed on your roof and pay a set price per month, which can allow you to save between 10% and 30% on your monthly ...

Our solar experts have put together this comprehensive guide to solar leasing to help you weigh the pros and cons of this financing option, identify red flags to look out for and decide if it's right for you.

In a typical solar lease, a third-party company (often called the lessor) installs and owns the panels on your property. You, the lessee, agree to pay a predictable monthly payment for the power generated.

Learn about typical monthly solar lease costs, factors affecting pricing and when it makes sense to consider leasing solar panels.

If you're considering solar leasing, you not only need to understand how it works, but you should also explore the pros and cons of deciding on solar leasing. Here's what you need to know.
