A 204MW battery energy storage system (BESS) project in Romania can progress after the government said it did not need to go through an environmental impact assessment (EIA).

The government has introduced a EUR150 million programme dedicated to local authorities, aiming to deploy 385 MW of battery energy storage systems (BESS) across cities and towns.

In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities.

Aukera Energy has secured a EUR60 million debt financing facility from Kommunalkredit Austria AG to support the construction of a landmark 250 MW / 500 MWh battery energy storage ...

Nova Power & Gas, part of the E-INFRA Group, has announced the commissioning and start of commercial operations of the largest battery energy storage system (BESS) in Romania. The ...

The BESS & Hybrid SPV portfolio represents a strategic platform of modern energy projects, adapted to market requirements and European trends in flexibility, digitalization and sustainability.

Chinese energy storage, EV charging and power quality solutions company Sinexcel said it is supporting the deployment of a 7.5MW/15.04MWh battery energy storage system (BESS) project ...

The largest battery energy storage system (BESS) to date in Romania, with a capacity of 200 MW/400 MWh, has been commissioned in Cluj County by the private investor Nova Power & Gas.

On February 2, YOTAI successfully signed a 135MW/270MWh standalone battery energy storage project with a leading Romanian energy group-Metropolitan Energy SRL in Bucharest. The project is ...

Romanian containerized energy storage vehicle BESS

Mass Global Energy Rom has announced a new strategic investment of approximately EUR1 billion in Battery Energy Storage System (BESS) capacities, bringing its total commitment to the ...
