The solar farm was constructed along the eastern side of Runway 3 at Rome Fiumicino Airport. The new infrastructure was designed by ADR and built by Enel in collaboration with Circet, ...

Rome Fiumicino Airport inaugurated a groundbreaking solar farm, the largest photovoltaic system in any European airport and among the world's largest. Designed by Aeroporti di Roma ...

Italy has agreed to a Vatican plan to turn a 430-hectare (1,000-acre) plot of land north of Rome into a vast solar farm that will generate enough electricity to meet the needs of Vatican City.

Aeroporti di Roma (ADR) today inaugurated its new solar farm, which instantly becomes one of the largest photovoltaic systems in the world within an airport perimeter. The solar farm is ...

Featuring 55,000 mono-crystalline silicon panels and a capacity of 22 MWp, the facility spans 2.5 kilometres and will generate over 30 million kWh of electricity annually, supporting ADR's ...

Creating the largest airport solar farm anywhere in Europe, the electricity produced by the panels will be used within the airport and reduce its reliance on fossil fuels. The new installation...

In addition to reducing the use of fossil fuels for the energy needs of airport operations, the new project will also enhance energy independence and resilience to market volatility.

The operator of Rome's Fiumicino airport on Monday opened a solar farm built by energy group Enel and network service provider Circet which is designed to cut its carbon dioxide (CO2) ...

A new 22-MWp solar farm at Rome's Fiumicino Airport will lower CO2 emissions by 11,000 tonnes per year.
