At Advanced Energy Systems, we've successfully helped businesses navigate the USDA REAP program for rural solar projects while delivering high-performance solar energy solutions.

The Rural Energy for America Program (REAP) offers federal grants and loans to help farmers and rural small business owners go solar, covering up to 50% of total project costs.

With ample land, strong solar potential, and new federal funding streams, rural solar development is on the rise. From farms to fairgrounds, small towns to tribal lands, solar is becoming a critical tool for ...

Beginning in March 2026, Stewart Glass will manufacture 150 tons of ultra-clear, fully tempered solar glass per day. The expansion and modernization of this facility will create more than ...

With their reflective, smooth glass sheen, stiff metal posts, and electric wiring, you might be surprised to learn that solar fields can be sites of thriving biodiversity, regenerative agriculture, ...

Research from a 2021 U.S. Department of Energy (DOE) study projects solar energy to rise from 4% of our nation's total energy production to 45% by 2050, potentially requiring nearly 10.4 ...

What are some examples of locally generated, accessible energy solutions? Reactivate has a portfolio of community solar projects across Illinois and New York that completed construction ...

Solar energy initiatives have become increasingly important in rural communities as a means of ensuring access to clean and sustainable energy sources. This article explores the ...

Research examines the social, economic, and operational impacts of agrivoltaics on farmers, rural communities, and rural electric cooperatives. Learn more about DOE's agrivoltaics research.

Solar projects built in counties with diverse local industries and a broader base tend to deliver the highest

Rural solar Glass Project

economic benefit per megawatt of solar installed, especially when sited on lower-quality ...
