Russia is rapidly building gigafactories for lithium-ion battery production -- projects that rival the world's biggest players. From New Moscow to Neman, these plants will produce up to 8...

Rosatom's Fuel Division, managed by TVEL, has launched pilot production at Russia's first lithiumion energy storage factory, "gigafactory"; in the Kaliningrad Region. The facility marks a ...

This is the only large-scale industrial production of full-cycle lithium-ion batteries in the country, from primary chemistry for the battery cell to the creation of final modules and complete ...

The announcement follows the Russian military's seizure of Shevchenko, a village in Ukraine's eastern Donetsk Region that is home to one of the country's largest lithium deposits. Until now, Russia had ...

Lithium-ion batteries of Russian enterprises are used in electric buses, electric vehicles, special equipment and in the power grid complex, sources of uninterrupted power supply and balancing ...

Nuclear technology company Rosatom, Russia's biggest electricity provider and the country's supplier of nuclear fuel for power plants, has opened an energy storage business unit ...

Lithium is a critical mineral for EV batteries and renewable energy storage, with global demand surging as nations transition away from fossil fuels. Russia's move aligns with its goal of ...

The announcement, made by the Russian Ministry of Natural Resources, signals a strategic shift towards reducing reliance on lithium imports and bolstering the nation's burgeoning ...

The launch of the Kaliningrad «gigafactory» is an industrial breakthrough for Russia and a huge contribution to the foundation of national technological sovereignty.

Russian lithium battery energy storage project

Russia views the development and production of energy storage systems as a key strategic area. It aims to lay a solid foundation for the sustainable growth of electric transport in the ...
