What is a shipping container solar solution?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

What is a mobile solar container?

The mobile solar container range redefines on-site power by harnessing the sun's energy in an efficient and reliable way to maximize the solar yield. Hybrid performance with a generator or an Energy Storage System makes the ZSC mobile solar containers as part of a microgrid solution.

What is a solar container?

The Solar container is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest. Panels lay flat on the ground.

Designed for Plug and play operations, the ZSC range of mobile solar power is easy to setup and commission. The compact container is easy to transport and is a low maintenance asset on site.

Buy or hire Solar Powered Shipping Containers in Australia. New & used, fast delivery, top prices. Get a free quote today.

We design and build shipping containers featuring integrated solar systems that can be used to provide microgrid energy solutions.
