With a high 0.9 power factor, controllable outlets and extended runtime options, Vertiv Edge is a cost-effective choice for protecting server and networking equipment in distributed and Edge IT applications.

The system is designed to provide reliable power to distributed computing networks and edge computing applications across various industries, including enterprise, government, manufacturing, finance, ...

Compact single-cabinet solution based on the proven IS-1 enclosure system for small decentralised solutions. Reliable climate control provided by a Slot-InCooler.

House your entire edge computing infrastructure in a single secure, prefabricated micro data center cabinet with self-contained cooling, monitoring, & more.

Ideal for data center power distribution, server rack PDU, rack power strip, network infrastructure, edge computing and IT cabinets. This 1U PDU features 13 NEMA 5-15R outlets and a 15A NEMA 5-15P ...

Edge Distributed Power Architecture Your Bottom Line. Transformed excess equipment and single points of failure in your office. By delivering 208 or 480 Vac directly to the frame and battery storage ...

42U rack cabinet and 5.5 kW rack-mount air conditioner combo kit provides cooling to IT equipment in server rooms and edge computing applications.

By moving computing and storage power closer to the source, infrastructure can be adapted and scaled as required. The modular design of edge data centers allows for increased flexibility and the ability to ...

Micro data centers with self-contained power, cooling, and security for powering low-latency and geo-specific edge applications. With modular data centers, DataBank can extend our Data Center ...

Single-phase power storage cabinet for edge computing

Explore what Edge computing is and how it (and the right IT enclosure system) can handle scalability, security, protection, disruptors, and standalone solutions.
