Let's look more in detail on power plant in Cities Skylines 2 because we have a lot of possible ways which source of energy use. For me is important to get know which of plants have ...

Wait for night, build an expansion battery for the plant. I expected that the solar power plant would charge its batteries during the day and then discharge them at night to power the city. ...

The Solar Power Plant is another source of renewable energy which converts sunlight into electricity. However, its output depends on the time of day and the latitude of the map.

First: Nope, it doesn't make sense that they aren't doing anything at night, because real-life solar power plants (like the PS10 [en.wikipedia]) use thermal storages to generate power at ...

Unfortunately, Cities: Skyline has an incredibly simplified power grid. I can't say it's terrible or catastrophic. But as for me, it can be quite an interesting mechanic that will add new challenges ...

About 55k pop, a geothermal and a solar plant. I turn the solar plant off in the winter (lakeland map so nights are very long). The geothermal is enough to provide for my whole city and during the summer, ...

The solar power plant is a power-generating structure capable of generating 160 megawatts during the day and 112 megawatts during the night. It is unlocked by meeting the Grand City milestone.

So basically any power plant producing for less than 2"500/MW can make you money. This is the case for a number of plants, however early on, the Wind Turbine is your best bet, as long ...
