Is a solar generator a portable power station?

A solar generator is just a portable power station, coupled with solar panels to re-charge it using the sun's rays.

Can I use a different brand of solar panels with my portable power station?

What is a portable power station?

A portable power station is a small battery storage generator that can be charged and provides power where and when you need it. This makes them good off-grid power sources when you need backup power during a power outage, are heading into the wilderness, or are working remotely on a job site.

What is the difference between a generator and a portable power station?

A portable power station is essentially a big rechargeable battery that you carry around. Deplete it, and it's useless until you can recharge. A generator, by definition, is a device that actually converts some type of energy to usable electricity in whatever circuitry you have it connected to.
