Could SMUD have killed a bad solar project?

SMUD could have killed a bad solar project months ago, but didn't. Why? |Opinion The Sacramento Municipal Utility District could have canceled its controversial solar farm contract known as Coyote Creek since September 2024, or so the utility says in an internal document.

Why did SMUD decide to buy solar power in 2021?

SMUD directors began to put themselves in a box when they unanimously voted to buy this solar power in 2021 without understanding the environmental or community consequences of what they were doing. And then the board wrote itself out of the loop by delegating the contract-signing authority to its long-time general manager, Paul Lau.

How does SMUD pay for solar panels?

If your solar panels make electricity you don't need right away, it gets sent to your neighbors by way of the wires outside your house. Under SMUD's Solar and Storage Rate, that electricity is purchased by the utility for \$0.074/kWh, no matter what time it is produced.

Can SMUD help a solar project get a permit?

Opponents, including the Rancheria, have since challenged the environmental document in Sacramento County Superior Court. SMUD, despite its private misgivings about this project for months, allowed its good name and its energy goals to help this solar project get past county supervisors and secure this key permit.
