Smartflower solar panels unfurl in the morning and track the sun across the sky. In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product.

What is a Solar Flower? A solar flower is a solar panel system that looks and moves like a flower. Imagine a large, beautiful sunflower, but it has solar panels instead of petals. These panels ...

While traditional solar panels sit quietly on your roof, the SmartFlower makes a statement in your yard with its ground-mounted design and flower-like appearance. The most significant ...

Enter the 2.4kW solar "flower", a sun-tracking photovoltaic system designed to maximize efficiency while blending (somewhat) naturally into my backyard.

Made with chemicals safer for human health and the environment. Manufactured on farms or in facilities that protect the rights and/or health of workers. Discover more products with sustainability features. ...

Unlike traditional rooftop systems, the Sunflower solar system is a ground-mounted, all-in-one solution that arrives pre-assembled and begins ...

Unlike traditional rooftop systems, the Sunflower solar system is a ground-mounted, all-in-one solution that arrives pre-assembled and begins generating power immediately after installation.

A complete review of Smartflower solar (solar flower) modules and whether they are worthwhile investment for homeowners.

Much like a real flower, the system unfolds its petal panels when the sun rises. The Smartflower then directs its petals toward the sun at a 90-degree angle and almost immediately begins to produce ...

SmartFlower puts it on display. The system opens like a giant metal sunflower each morning, follows the sun

# Solar Power Sunflower

all day, and folds itself to rest at night. It is more than a pretty sight. The ...
