S1-W4G-ST data stick is a brand new one of a kind datalogger. This datalogger uses cellular technology to connect to Soliscloud. Not only does it have that, but you can also connect with WIFI.

The Solis S4-WIFI-ST WiFi Data Logger Stick is an innovative accessory ...

The Solis S4-WIFI-ST WiFi Data Logger Stick is an innovative accessory designed for Solis solar inverters, enabling efficient and remote monitoring of solar system performance via a wireless ...

The product offers support for a rich set of data protocols, including TCP/UDP/HTTP, enabling it to connect with diverse protocol servers and facilitating the remote monitoring of solar energy ...

These unique communication tools remotely transmit PV plant operation data to the SolisCloud monitoring system in real time. Connected to the SolisCloud, system operators can conduct accurate ...

Use RS485 communication method to connect the inverter, and data connection through wireless WiFi network, which can realize remote control and monitoring. The network transmits intuitive data, which ...

The Solis S3-WIFI-ST data logger operates by collecting data from connected inverters and transmitting it over a wireless connection. This process is straightforward, allowing both technical and non ...

By using the USR-S100-WA12 data stick, customers are able to send data from inverters to the PUSR cloud or to their privately-owned servers.

The Solis S2-WL-ST Data Logging Stick is an accessory designed for efficient solar system monitoring. It uses RS485 communication to connect with up to 10 inverters simultaneously, facilitating data ...
