The Global Solar Power Tracker is composed of worldwide facility-level data on utility-scale (1 MW+) solar photovoltaic (PV) and solar thermal facilities, as well as country-aggregated distributed (&lt;1 ...

Most operational CSP stations are located in Spain and the United States, while large solar farms using photovoltaics are being constructed in most geographic regions. The worldwide growth of ...

About this data Electricity generation from solar power Figures are based on gross generation and do not account for cross-border electricity supply.

Data and analysis including a list of solar power in every country in the world, countries with the most solar power, and countries that generate the highest percentage of their electricity from solar power.

This dashboard ranks countries/areas to their renewable energy power capacity or electricity generation. The data can be further refined based on region, technology or year of interest.

PVGIS country maps show solar radiation and photovoltaic electricity potential for different regions worldwide. Each country displays color-coded indicators showing how many downloadable maps are ...

Find and download solar resource map images and geospatial data for the United States and the Americas. For more information on NLR's solar resource data development, see the National Solar ...

Discover the best states for solar power production in the country with our February Solar Energy Generation Report. Where does your state rank?

Global map showing practical solar energy potential after excluding for physical, environmental and other factors. The potential for clean, carbon-free electricity generation from solar photovoltaic (PV) ...

# Solar power generation areas in my country

Calculate energy production for selected sites. The Global Solar Atlas provides a summary of solar power potential and solar resources globally.
