Numbers calculated by financial advisory Lazard as of June 2025 estimate price ranges for the generation of one MWh of energy by different sources.

Comprehensive 2025 guide to renewable energy costs. Compare solar, wind, and clean energy pricing vs fossil fuels. Includes latest LCOE data, trends, and projections.

Utility scale solar projects had a range of \$38 to \$78 per MWh. A new combined-cycle natural gas plant, by contrast, had a cost of \$48 to \$109. But an existing gas plant had a cost range ...

Here is a breakdown of the cost of renewable energy according to our research, ranked by least to most expensive: Compare these costs to ultra-supercritical coal, which costs \$72.78 per megawatt-hour, ...

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Read more to find out how these cost benchmarks are ...

As of 2023, solar is 14% cheaper than energy produced by gas. But if we look back to 2009, solar was 433% more costly than energy generated by gas. Today, wind is the lowest cost ...

The average cost per unit of energy generated across the lifetime of a new power plant. This data is expressed in US dollars per kilowatt-hour. It is adjusted for inflation but does not account for ...

Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential ...

In December 2020, IEA and OECD NEA published a joint Projected Costs of Generating Electricity study which looks at a very broad range of electricity generating technologies based on 243 power plants ...

Renewables continue to prove themselves as the most cost-competitive source of new electricity generation.

Solar power generation electricity cost

On an LCOE basis, 91% of newly commissioned utility-scale renewable capacity ...
