The energy storage provider INTILION and Axpo, one of the largest producer of renewable energy in Switzerland, have successfully completed the first joint project.

With the Zurich Energy Storage Project 2024, the country takes another leap toward achieving its 2050 net-zero targets. This project focuses on large-scale battery storage systems designed to balance ...

ETH Zurich and EPFL want to work with partners from politics, science and industry to push innovative storage and transport solutions for renewable energy carriers.

Switzerland's new EUR2 billion energy storage initiative isn't just another infrastructure project - it's a moonshot combining hydropower tradition with cutting-edge tech. Let's unpack why this ...

This article explores cutting-edge storage solutions reshaping grid stability while addressing renewable energy intermittency - a challenge affecting solar, wind, and hydroelectric systems alike.

As Switzerland's innovation hub, Zurich is driving breakthroughs in energy storage systems and advanced battery materials. This article explores cutting-edge developments, market trends, and ...

Well, they're now making waves in energy storage. The Federal Council just launched Europe's most ambitious battery storage tender - a 900 MW capacity push to solve their Alpine energy puzzle.

Regardless of the final decision, the draft highlights a growing political consensus: long-term storage is a key enabler for a resilient, renewable, and defossilized energy system in Switzerland.

With a new professorship, ETH Zurich aims to work closely with industry partners to create forward-looking solutions for the storage and integration of renewable energy.

Swiss zurich energy storage industry investment project

CGES is a coalition for green energy and storage in Switzerland, bringing together stakeholders from businesses, associations, academia, and public entities, in order to create a platform for exchange ...
