Thailand's decarbonisation commitments in its Nationally Determined Contributions (NDCs) under the Paris Agreement have triggered new rounds of renewable energy deployment, ...

With the introduction of Direct PPAs, an increase in renewable energy targets and a growing emphasis on energy storage under the draft PDP 2024 and the 2024 FiT scheme, Thailand ...

Thailand is set to launch direct PPAs for renewable energy. Explore how this initiative will transform the energy landscape today!

As part of the renewable energy procurement round in 2022, the government awarded projects to 24 solar plus co-located BESS projects, with a total capacity of 994 MW.

The regulations set out the key features, nature, and scope of eligible renewable energy projects as well as the qualifications of eligible project participants.

Thailand's 2024 plan increases renewable energy, highlighting crucial battery storage systems for buildings and power generation.

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see the country ...

Summary: The Thailand Chiang Mai energy storage project bidding represents a critical step in advancing renewable energy adoption and grid stability. This article explores the project's scope, ...

Thailand's energy storage sector is booming, driven by government initiatives and renewable integration goals. This article explores key bidding strategies, market insights, and how businesses can leverage ...
