Specially designed with a custom carrier that functions as a cargo receptacle, GEDA's solar panel lift is a space-saving way to reach inaccessible loading areas.

The Solmetric Module Lift is designed to help you safely and quickly transport a solar PV module on to a roof. The system uses your existing Werner or Louisville fiberglass extension ladder.

In this guide, we'll explain a typical solar panel installation from start to finish, as well as what all the hardware does, and where on your property you can install the panels. ...

A PV walkway board is a durable, lightweight panel system installed on or around solar photovoltaic (PV) modules to create a safe walking path for inspection, cleaning, and repairs.

The ladder we build symbolizes not only a pathway to renewable energy but also an intersection of art, engineering, and nature. With each step along this path, we contribute to a ...

The Solmetric Module Lift is designed to safely and quickly transport a PV module to a roof. The device uses your existing fiberglass Werner or Louisville extension ladder.

Carrying modules up a ladder, working near edges, or moving around on steep or slick roofs all add up to a lot of potential "uh-oh" moments. Our Ladder & Roof Safety collection is built to give solar crews ...

Let's face it - installing photovoltaic panels often feels like preparing for Mount Everest: you need perfect balance, nerves of steel, and equipment that won't bail on you mid-climb. Enter the electric ladder for ...

You know, 78% of solar installation injuries occur due to improper ladder use according to the 2024 Solar Safety Report. But what makes photovoltaic panel work so different? Traditional ...

The tow board of the photovoltaic panel ladder

In the hierarchy of control, ladders must only be used to reduce the risk of a fall after consideration of elimination, passive fall prevention, work positioning systems and fall arrest systems are deemed not ...
