LOME, Nov. 7 (Xinhua) -- Togo on Thursday received 3,900 sets of photovoltaic power generation systems provided by China under the "Africa Solar Belt" project.

The project, co-financed by Proparco and led by EDF, involves a solar power plant in Sokodé; aimed at boosting Togo's energy output and attracting new private investments.

Developed by French energy group "Electricité de France (EDF), the project includes the design, construction, and operation of a brand-new solar power plant and an 11-kilometer ...

Togo's new solar farm, co-developed by EDF and Meridiam with support from AfDB, SEFA, and Proparco, will generate 87 GWh of clean electricity annually - strengthening energy ...

Togo is preparing to launch an ambitious 400-megawatt (MW) solar energy development project as part of its strategy to achieve universal access to electricity by 2030. Last week, a ...

The project aligns with Togo's goal to reach 200 MWp of renewable energy by 2030. EDF Group will design, build, and run the plant, with co-financing from Proparco, the private sector arm of ...

The African Development Bank Group's Board of Directors has approved a EUR26.5 million financing package to support the development of a 62-megawatt greenfield solar photovoltaic power ...

The Kpalassi solar project is integral to Togo's energy transition strategy. It is expected to produce enough electricity to power approximately 700,000 households, significantly reducing the ...

Developed by Meridiam and "Electricité de France (EDF), the project is integral to achieving Togo's 2030 goal of installing 200 MWp of renewable energy capacity, enhancing the ...
