Powered by the proprietary SOMA Pro SCADA platform, Solargik provides integrated control, real-time diagnostics, predictive automation, and performance optimization.

In this study, a Mamdani-type fuzzy logic-based intelligent control system is developed and experimentally validated for a cabinet solar dryer operating under real summer climatic ...

Uzbekistan connected the initial phases of two solar power plants, totalling an installed capacity of 500 MW, to the national grid. These plants are maintained using intelligent PV cleaning ...

“The new solar plant with a battery energy storage system will not just boost the uptake of renewable energy in the country, but also help stabilize and strengthen existing electricity grids ...

Uzbekistan, with its 300+ sunny days annually, is a prime location for solar energy adoption. Cities like Tashkent and Samarkand are increasingly deploying solar street light energy storage control ...

In this study, a Mamdani-type fuzzy logic-based intelligent control system is developed and experimentally validated for a cabinet solar dryer operating under real summer climatic conditions in ...

President Mirziyoyev first toured a manufacturing plant in Nukus and inspected Uzbekistan's first PV module automated production line. This project commenced operations this ...

During the roundtable, the I-TRACK Foundation and the Center of Green Economy Projects delivered a presentation on the I-REC certification system, its significance, and the current ...

Considering the average solar panel lifetime, the treatment of end-of-life solar panels is not a pressing issue in Uzbekistan, but it is important to incorporate appropriate policy measures into the current ...

Uzbekistan solar intelligent control system

After discussing the possible barriers to the deployment of solar energy in Uzbekistan, the report presents a roadmap for solar energy by 2030. It provides examples of international best practices in ...
