Diagram showing the major components of the Vanguard "minimum satellite" used in the initial test flights of the program. (NASA) Work to repair the damage caused by the TV-3 explosion at ...

Detailed schematic diagram of the Vanguard 1 rocket showing its workings. Explore the intricacies of the first solar-powered satellite launched by the United States.

This circuit diagram was near equivalent to the oscillator stage of the 80 mW, 2-transistors telemetry transmitter designed for the Vanguard 2. This is the original drawing (oscillator section), with detailed ...

Vanguard 1 remains the oldest man-made object in space, expected to orbit Earth for about 1,000 years. Vanguard 2 returned the first photo from space. Vanguard was also a small three-stage rocket used ...

Download scientific diagram | 1 Vanguard 1 satellite (reproduced with permission from NASA) from publication: Book Review: After Modernity.

It was a small satellite designed to test the launch capabilities of a three-stage launch vehicle and study the effects of the environment on a satellite and its systems in Earth orbit. It also was to be used to ...

Vanguard 1, the world's first solar-powered satellite, launched on St. Patrick's Day (March 17) 1958. It was designed to test the launch capabilities of a three-stage launch vehicle and the ...

On 17 March 1958, the three-stage launch vehicle placed Vanguard into a 654 km × 3,969 km (406 mi × 2,466 mi), 134.27-minute elliptical orbit inclined at 34.25°. Original estimates had the orbit lasting for 2,000 years, but it was discovered that solar radiation pressure and atmospheric drag during high levels of solar activity produced significant perturbations in the perigee height of the satellite, which caused a

significant decrease in its expected lifetime to about 240 years. Vanguard 1 transmitted its signals for ...

Diagram of the grapefruit-sized Vanguard 1 satellite.

Because of its symmetrical shape, Vanguard 1 was used by experimenters for determining upper atmospheric densities as a function of altitude, latitude, season, and solar activity.
