Discover how Synhelion is revolutionizing fuel production with solar power to make a new kind of completely sustainable synthetic fuel.

This breakthrough comes at a critical time - global energy demand is projected to leap 47% by 2050, while traditional power sources struggle with geopolitical tensions. But can this technological marvel ...

Carbon-neutral fuel developer Synhelion has completed the construction of DAWN, the world's first industrial solar fuel plant, with installation of the "mirror field" marking the completion of ...

With this plant, Synhelion has validated its technology on an industrial scale, proving its readiness for large-scale deployment. Located in Jülich, Germany, DAWN is fully operational and produces ...

The world's first industrial-scale solar fuel plant, named "Dawn," has recently opened in Germany. This plant has the capacity to produce 1,000 tons of fuel annually, marking a significant ...

DAWN is the world's first industrial solar fuel plant for producing carbon-neutral solar fuels. Synhelion, a green tech company that evolved from the Swiss Federal Institute of Technology (ETH Zurich), ...

In this video, we take you on a tour of our first industrial-scale solar fuel plant, called DAWN. With this plant, Synhelion demonstrates the entire Sun-to-Liquid process on an industrial...

In the meantime, DAWN's progress will be watched closely by those pushing for a suite of approaches to more rapidly bring us to a carbon-neutral world.

In June 2024, Synhelion marked a significant milestone by inaugurating DAWN, the world's first industrial plant designed for the continuous production of solar fuels. Located in Jülich, ...

The inauguration of DAWN marks the beginning of the era of solar fuels - a turning point for sustainable

Watching the Dawn Solar Power Plant

transportation. Our founding dream of producing renewable fuels from solar energy is ...
