## What is the 6V current of the solar panel

The maximum current of a 6V six watt solar panel is approximately 1 ampere, which can be calculated using the formula  $\text{Current (I)} = \text{Power (P)} / \dots$

Since 4 4 people are sharing the cost, you divide both sides by 4 4:  $p = 264 = 6.50$   $p = 426 = 6.50$ . This is a simple division problem; but it's also a perfect example of solving for a variable. You're ...
