Varistar cabinet platform and LHX series air/water heat exchanger combine to deliver the ultimate containment solution for high-density equipment. Flexible and scalable, Varistar cabinets can ...

With less than 2% temperature variation from top to bottom of the cabinet, DDC delivers consistent air supply and temperature management to even the most dynamic workloads. An innovative liquid heat ...

Introducing FlexFusion™ Data Center Cabinets - Your Premier Choice for Converged Infrastructure

Push beyond the limits of traditional data center cooling with DDC S-Series, patented cabinet technology that supports GPU, HPC, and AI infrastructure with ultra-high-density air and liquid to chip ready ...

Elevate™ Adjustable Containment Solution offers a cutting-edge approach to improve data center efficiency through effective hot air management. This innovative system links two rows of cabinets, ...

The Contain-IT FLEX containment solution is designed to maximize efficiency while creating a predictable operating environment that increases equipment reliability.

Minkels is a knowledge-driven producer and worldwide supplier of high-quality cabinet, aisle containment and cooling solutions for data center infrastructure. Minkels products stand out for their ...

Learn about critical factors such as efficiency, reliability and integration with existing data center infrastructure to optimize thermal performance and energy use.

With the Next Generation Corridor, Legrand Data Center Solutions offers a solution which is more energy-efficient than other Corridor-models on the market.

In scenarios like oil rigs or chemical plants, elevated temperatures exacerbate chemical reactivity. YANSEN

Wide-temperature installation solution for data center cabinets in chemical plants

designs SSD enclosures with anodized aluminum shielding that provides thermal ...
