Why is Zambia halting its electricity exports?

Zambia's government has announced a cut in electricity exports due to low power generation in the country. In an interview with ZANIS, Energy Minister Peter Kapala explained that the government will not completely halt exports in order to maintain existing power markets.

What is the energy sector in Zambia?

The energy sector in Zambia, specifically the petroleum industry, is one of the key sectors of the economy. Petroleum is the only energy source that is 100 per cent imported in Zambia. In agreement with the Competition and Consumer Protection Commission, the petroleum sector has been identified as a special sector which requires analysis.

Why is energy access so important in Zambia?

Economic growth is synonymous with energy access. Zambia also has long and intense hours of annual sunlight to support solar energy generation. Demand for energy has been rising due to economic activity in the country particularly in the mining, manufacturing and agriculture sectors.

What indigenous energy resources does Zambia have?

Apart from petroleum, which is wholly imported, Zambia is endowed with plenty of indigenous energy resources such as woodlands for wood fuel, hydropower, coal, and renewable energy. The passage also mentions the sources of Zambia's energy demand, but the focus is on the indigenous resources.

Zambia Energy Storage Market (2025-2031) | Share, Industry, Competitive Landscape, Growth, Analysis, Companies, Outlook, Trends, Segmentation, Value, Forecast, Size & Revenue
